

TMTB Morning Wrap

TMTB 晨间简报

TMT BREAKOUT
3 MINUTES AGO • PAID

Good morning. **QQQs +55bps** hitting more fresh ATHs. as bull market vibes begin to creep in. In macro land, rates are getting some relief (yields down 3-6 bps across the curve) as France's Marine Le Pen's aggressive fiscal consolidation plan drives a rally in European sovereigns, while Bessent said the US can "very quickly" bend the debt curve. In the Middle East, **Oil -2%** as exports normalize, Yemen's Saudi-backed government reportedly recaptured key territory from the Houthis near the Bab el-Mandeb Strait, and Saudi confirmed its East-West pipeline is flowing at 5.8mbd.

早上好。QQQ 上涨 55 个基点，再创多个历史新高，牛市氛围开始逐渐升温。宏观方面，利率有所缓解（收益率曲线各期限下跌 3-6 个基点）：法国玛丽娜·勒庞激进的财政整顿计划推动欧洲主权债券反弹；贝森特表示，美国可以“非常迅速地”扭转债务曲线。中东方面，随着出口恢复正常，Oil 下跌 2%；据报道，沙特支持的也门政府从胡塞武装手中夺回了曼德海峡附近的重要地区；沙特确认其东西向输油管道输送量达到 5.8mbd。

In Tech, both semis and software +1%. **HDDs -2-3%** on news Toshiba/Seagate competing over TDK; **SHOP +3%** on a positive JPM note; **Cyber** rallying on reports of hacks in Korea.

科技板块中，半导体和软件均上涨 1%。消息称东芝/Seagate 围绕 TDK 展开竞争，HDD 下跌 2-3%；JPM 发布积极研报后，SHOP 上涨 3%；韩国遭遇黑客攻击的报道带动网络安全股上涨。

Asia mixed overnight: TPX +0.92%, NKY +1.05%, Hang Seng +1%, HSCEI +0.96%, Taiwan TAIEX +0.22%, Korea KOSPI -0.89%

亚洲市场隔夜表现不一：TPX +0.92%，NKY +1.05%，Hang Seng +1%，HSCEI +0.96%，台湾 TAIEX +0.22%，韩国 KOSPI -0.89%

MRVL AND ZS Investor Day today

STX / WDC / TDK: Seagate and Toshiba vie for key HDD head supplier – Bloomberg

STX / WDC / TDK：希捷与东芝竞购重要 HDD 磁头供应商——Bloomberg

Bloomberg reports Seagate and Toshiba are competing for TDK’s HDD magnetic-head business in a deal potentially worth several billion dollars, with Seagate submitting a higher offer after Toshiba began talks. TDK is the only independent head supplier; Toshiba relies on it entirely, including for its HAMR roadmap, while Seagate and WDC use it to supplement in-house output. Toshiba disputed the report and denied a reported meeting.

Bloomberg 报道称，希捷与东芝正在竞购 TDK 的 HDD 磁头业务，这笔交易潜在价值达数十亿美元。东芝启动谈判后，希捷提交了更高的报价。TDK 是唯一一家独立磁头供应商；东芝完全依赖 TDK 供货，包括其 HAMR 路线图所需的磁头，而希捷和 WDC 则利用 TDK 的产品补充内部产能。东芝对该报道提出异议，并否认曾举行相关会面。

STX/WDC: Evercore says HDD bottleneck shifts upstream, making vertical integration the key advantage in HDD Deepdive

STX/WDC：Evercore 在《HDD 深度解析》中称，HDD 瓶颈正向上游转移，使垂直整合成为 HDD 领域的关键优势

Evercore argues higher areal density shifts the HDD bottleneck from final assembly to heads, HAMR photonics, media/glass and test, favoring vertically integrated STX/WDC

over Toshiba's merchant-supplier model. It expects 2027–28 shortages to be driven by components rather than drive assembly, while 32TB 10-disk HAMR drives carry ~\$190–195 of BOM and 40TB drives should improve cost/TB by ~20%.

Evercore 认为，更高的面密度会使 HDD 瓶颈从最终组装转向磁头、HAMR 光子器件、盘片/玻璃基板及测试环节，因此垂直整合的 STX/WDC 将比采用供应商供货模式的 Toshiba 更具优势。该机构预计，2027–28 年的短缺将由零部件而非硬盘组装驱动；32TB、10 盘片 HAMR 硬盘的 BOM 为~\$190–195，而 40TB 硬盘的每 TB 成本应降低~20%。

AMD: Su plans substantial supply increase in 2027 – Reuters

AMD：Su 计划在 2027 年大幅增加供应——Reuters

Reuters reports Lisa Su said AMD plans to substantially increase chip supply in 2027 after raising output this year, citing very high demand over the next several years. During her Taiwan visit, Su said AMD is working with partners to expand both CPU and GPU production and secure memory supply. She said the industry needs more advanced wafer capacity and AMD is now planning three to five years ahead.

Reuters 报道称，Lisa Su 表示，AMD 计划在今年提高产量后，于 2027 年大幅增加芯片供应，并指出未来几年需求极其旺盛。Su 在访问台湾期间表示，AMD 正与合作伙伴合作，扩大 CPU 和 GPU 的产能并确保内存供应。她表示，行业需要更多先进晶圆产能，AMD 目前正在制定未来三至五年的规划。

AMD: Citi raises PT to \$800 as agentic AI expands CPU TAM to ~\$300B by 2030

AMD：Citi 将目标价上调至\$800，称代理式 AI 将推动 CPU TAM 到 2030 年扩大至~\$300B

Citi says always-on agents like Muse could drive orders-of-magnitude more compute than chatbots, expanding CPU TAM from ~\$29B in 2025 to ~\$300B by 2030 (~60% CAGR), with AMD the primary beneficiary and Intel secondary. Citi estimates 100M Muse DAUs could also require ~200–390K B200-class GPUs / 2.8–5.5K NVL72 racks, worth ~\$7–19B to NVDA, while rising CPU density creates incremental DRAM/SSD and networking demand; reiterates NVDA Buy/\$315.

Citi 表示，Muse 等始终在线的智能体所需算力可能达到聊天机器人的数个数量级，从而推动 CPU TAM 从 2025 年的~\$29B 扩大至 2030 年的~\$300B（CAGR 约 60%）；AMD 将是主要受益者，Intel 则为次要受益者。Citi 估计，1 亿 Muse DAU 还可能需~200–390K 张 B200 级 GPU / 2.8–5.5K 个 NVL72 机架，为 NVDA 带来价值~\$7–19B 的需求；与此同时，CPU 密度提升将带动 DRAM/SSD 及网络设备的增量需求。重申对 NVDA 的 Buy 评级，目标价为\$315。

SHOP: JPM sees agentic commerce driving share gains, outlines bull case to ~30% '27 revenue growth

SHOP: JPM 认为智能体商务将推动份额增长，勾勒出'27 年收入增长达~30%的牛市情景

JPM says SHOP is well positioned across all three layers of agentic commerce, with Shop Pay preserving payment economics while AI traffic converts better and drives larger merchant sales. Its bull case gets to ~30% '27 growth via core business, Europe/international, enterprise and offline expansion, with pricing adding ~\$90M of annualized subscription revenue; JPM raises 2H26/'27 estimates ~1–3% and sees ~20% FCF margins sustained. Reiterates OW, raises PT to \$200 from \$185 and keeps SHOP on the Analyst Focus List.

JPM 认为，SHOP 在智能体商务的三个层面均处于有利位置；Shop Pay 能够维持支付业务的经济效益，同时 AI 流量转化率更高，并推动商户销售额增长。其牛市情景预计，核心业务、欧洲 / 国际市场、企业业务及线下业务拓展将推动'27 年增长至~30%；定价调整将新增~\$90M 年化订阅收入。JPM 将 2H26/'27 年预期上调~1–3%，并预计~20%的 FCF 利润率能够维持。重申 OW 评级，将目标价从\$185 上调至\$200，并继续将 SHOP 列入 Analyst Focus List。

We wrote a little about SHOP in our [EOD Wrap](#) yesterday in case you missed it

以防你错过了，我们昨天在 EOD Wrap 中简要谈到了 SHOP

GOOGL / CEG: Google signs 3.6GW power deal with Constellation – [Reuters](#)

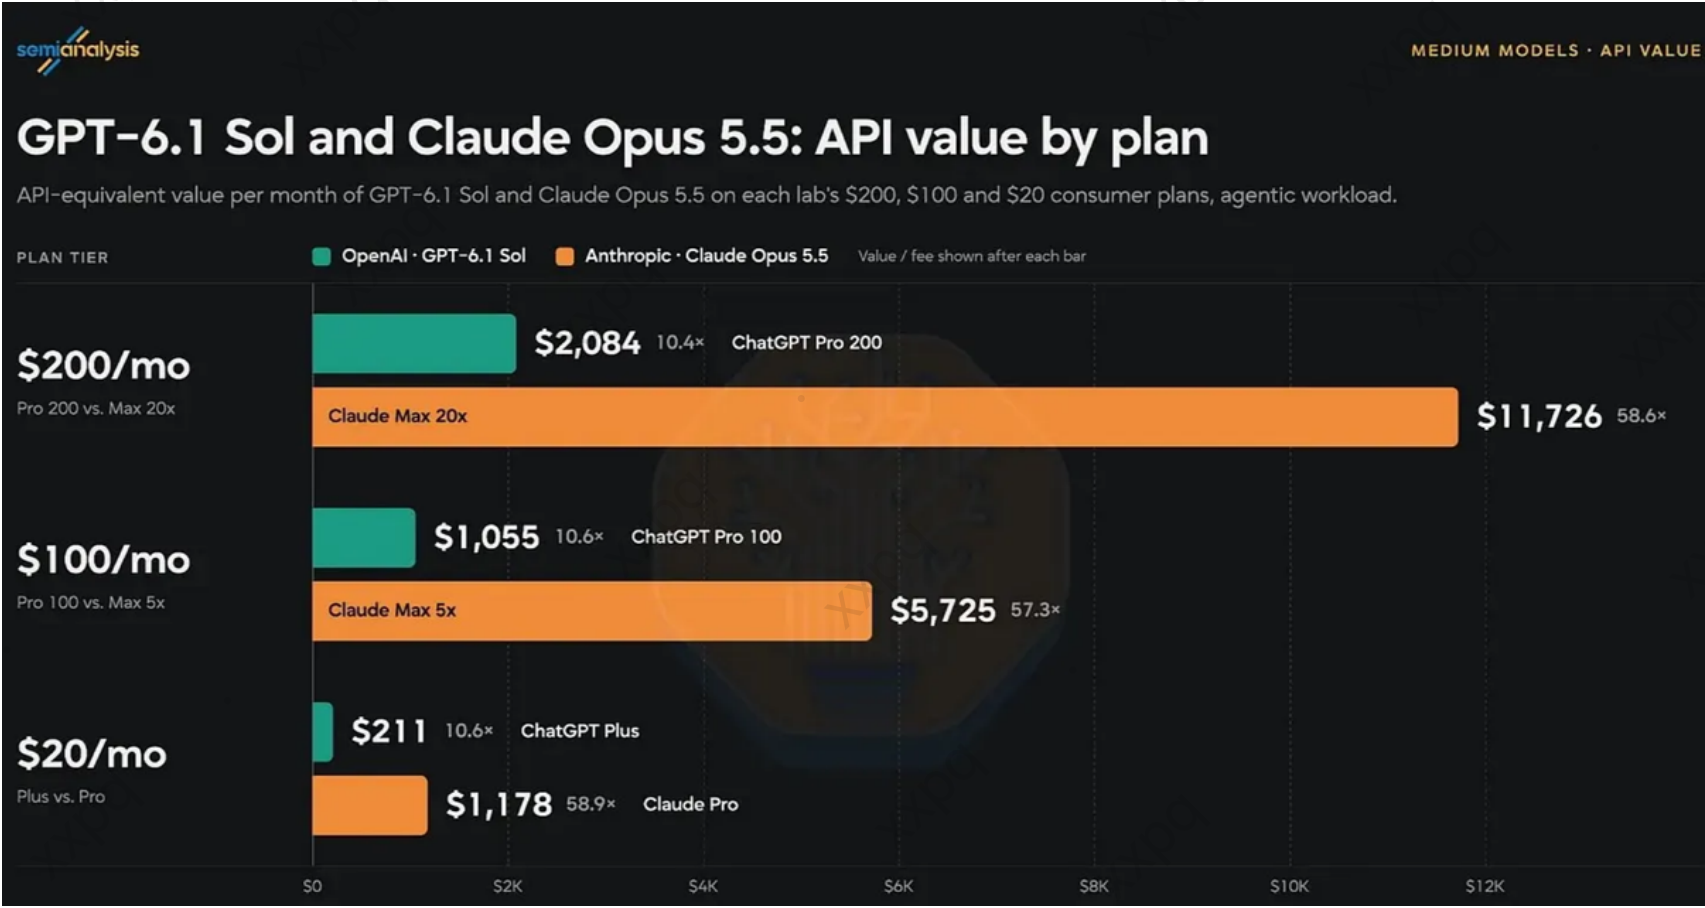

GOOGL / CEG: Google 与 Constellation 签署 3.6GW 电力协议——Reuters

Reuters reports Google contracted 3,590MW of power from Constellation in the PJM market. A 20-year agreement covers 890MW of new nuclear output from upgrades to 11 existing units, enabling more than \$4.3B of investment, with initial electricity expected in 2028. The remaining 2,700MW is long-term supply not tied to a specific generation source. Reuters notes the deal comes as PJM considers requiring large new users to bring their own power supply or accept shutdowns during periods of peak demand.

Reuters 报道称，Google 与 Constellation 签订合同，将在 PJM 市场采购 3,590MW 电力。一项为期 20 年的协议涵盖通过升级 11 座现有机组新增的 890MW 核电出力，可带动超过\$4.3B 的投资，预计首批电力将于 2028 年供应。剩余的 2,700MW 为长期供电，未绑定特定发电来源。Reuters 指出，PJM 正在考虑要求大型新增用户自备电力，或在用电高峰期间接受停电；这笔交易正是在此背景下达成的。

SemiAnalysis estimates subscriptions can consume >40% of inference compute despite being only ~10% of revenue, materially depressing revenue/MW; for Anthropic the hit is ~\$36M/MW. OpenAI just halved token limits on its \$200 plan and standardized tokens/\$ across its \$100/\$200/\$500 tiers, while Anthropic now offers ~4–5x better API-equivalent value on Opus-class usage. The broader implication is that subscription limits are becoming an important lever for labs to improve inference margins, with OpenAI taking the more aggressive path versus Anthropic's gradual reduction in subsidies.

SemiAnalysis 估算，订阅服务虽然仅占收入的~10%，却可能消耗超过 40% 的推理算力，显著拉低每 MW 收入；对 Anthropic 而言，影响为~\$36M/MW。OpenAI 刚刚将其\$200 套餐的 token 限额砍半，并统一了\$100/\$200/\$500 各档套餐的 tokens/\$；与此同时，Anthropic 现在在 Opus 级别的使用场景下，提供的 API 等效价值高出~4-5 倍。更广泛的影响是，订阅限额正成为 AI 实验室提升推理利润率的重要手段。与 Anthropic 逐步减少补贴相比，OpenAI 采取了更激进的做法。

AVGO / Anthropic: Banks launch \$60B chip financing; Broadcom backs \$42B – FT

AVGO / Anthropic： 银行推出\$60B 芯片融资方案； Broadcom 提供\$42B 支持——FT

FT reports BofA, Citi and Morgan Stanley began syndicating \$42B of senior loans backed by Broadcom as part of a record \$60B financing for Anthropic to lease Google TPUs. Another \$18B of junior debt carries no Broadcom guarantee; Blackstone has committed roughly \$9B and is syndicating the balance. The financing covers Anthropic's 2027 chip orders, with lease payments starting after delivery. FT also reports Anthropic could issue up to \$42B of convertible notes to Broadcom to fund those payments. Junior lenders would bear Anthropic's credit risk directly

据 FT 报道，BofA、Citi 和 Morgan Stanley 已开始联合承销由 Broadcom 提供担保的 420 亿美元优先贷款，这是 Anthropic 为租用 Google TPU 筹集的创纪录 600 亿美元融资的一部分。另有 180 亿美元次级债务不附带 Broadcom 担保；Blackstone 已承诺约 90 亿美元，并正在联合承销其余部分。这笔融资用于支付 Anthropic 2027 年的芯片订单，租赁款项将在交付后开始支付。FT 还报道称，Anthropic 可能向 Broadcom 发行至多 420 亿美元的可转换票据，以支付这些款项。次级贷款方将直接承担 Anthropic 的信用风险

GOOGL: Wells sees TPU sales at \$99B/\$169B in '27/'28, but only ~13% GM

GOOGL: Wells 预计 TPU 销售额将在'27/'28 年达到 990 亿美元/1,690 亿美元，但毛利率仅为~13%

Wells raises external TPU deployments to 4GW/7GW in '27/'28, implying ~\$99B/\$169B revenue, ~40% of GCP, but just ~6%/~8% EPS contribution given a ~15% licensing markup/~13% GM. The framework has GOOGL buying TPU systems from AVGO at ~\$21B/GW and selling at ~\$24B/GW, while AVGO ultimately sells to the financing SPV at ~\$35B/GW and provides the financial backstop, helping reconcile its higher content/revenue per GW.

Wells 将外部 TPU 部署量上调至'27/'28 年的 4GW/7GW，对应收入为~990 亿美元/1,690 亿美元，相当于 GCP 的~40%，但由于~15%的授权加价/约 13% 的毛利率，EPS 贡献仅为~6%/~8%。据其测算，GOOGL 以~每 GW 210 亿美元的价格向 AVGO 采购 TPU 系统，并以~每 GW 240 亿美元的价格出售；而 AVGO 最终以~每 GW 350 亿美元的价格向融资 SPV 出售，并提供财务兜底，这有助于解释其每 GW 更高的产品价值和收入。

Cybersecurity: Korea and Japan breaches spur security-stock rally – [FT](#) / [Xinhua](#)

网络安全：韩国和日本数据泄露事件推动安全类股票上涨——FT / 新华社

FT reports South Korea's president flagged possible AI use in attacks exposing customer data at seven financial firms. Attackers targeted third-party systems, including a loan-broker portal that exposed about 25,000 Shinhan Bank customers.

Xinhua reports separate breaches across Japan potentially affecting millions, including at least 130,000 students and teachers at Osaka Metropolitan University, where a suspected ransomware attack disabled about 500 servers.

FT 报道称，韩国总统指出，针对七家金融机构、导致客户数据泄露的攻击中，可能使用了 AI。攻击者以第三方系统为目标，包括一个贷款经纪平台，该平台导致约 25,000 名新韩银行客户的信息暴露。新华社报道称，日本各地还发生了多起独立的数据泄露事件，可能影响数百万人，其中包括大阪公立大学至少 130,000 名师生；该校约 500 台服务器因疑似勒索软件攻击而瘫痪。

SPCX: GS raises CY26–28 numbers, says AI estimates still conservative despite massive capex ramp

SPCX: GS 上调 CY26–28 业绩预测，称尽管资本开支大幅攀升，AI 相关预估仍偏保守

GS raises CY26/27/28 revenue to \$51.6B/\$127.5B/\$205.6B from \$47.6B/\$107.4B/\$180.6B and EPS to \$1.30/\$3.96/\$7.01, citing new hosting deals, model improvements and tight compute supply. Terrestrial compute capacity ramps from 2.4GW in 2026 to 7.0GW/10.6GW in 2027/28, but capex of ~\$72B/\$222B/\$193B drives deeply negative FCF, making funding and monetization the key debate. GS maintains Buy/\$230 and views AI estimates as more floor than ceiling.

GS 将 CY26/27/28 营收预测从\$47.6B/\$107.4B/\$180.6B 上调至 \$51.6B/\$127.5B/\$205.6B，并将 EPS 预测上调至\$1.30/\$3.96/\$7.01，理由包括新增托管业务协议、模型改进以及计算资源供应紧张。陆基计算容量将从 2026 年的 2.4GW 提升至 2027/28 年的 7.0GW/10.6GW，但 ~\$72B/\$222B/\$193B 的资本开支将导致 FCF 大幅为负，使融资和变现成为争论焦点。GS 维持买入评级/\$230 目标价，并认为 AI 相关预估更接近下限而非上限。

AI SEMIS: Mizuho sees agentic AI driving ~30% of 2030 server CPUs, pushing CPU TAM above \$200B

AI 半导体：瑞穗认为，代理式 AI 将推动 2030 年服务器 CPU 需求占比达到~30%，使 CPU TAM 突破\$200B

Mizuho says always-on agents like Muse and Dots could drive a major CPU demand

inflection as orchestration, tool calls and sandbox workloads increasingly run 24/7, with agentic CPU penetration rising from ~4% today to ~30% by 2030. It models total server CPU TAM growing from ~\$68B in 2026 to ~\$209B by 2030, including ~\$80B of agentic CPUs; AMD is the preferred beneficiary, while NVDA standalone CPU revenue could grow >100% y/y in 2027 and ARM benefits from AGI CPU plus royalties across Vera/Graviton/Axion/Cobalt. Memory also benefits, with agentic AI potentially driving ~18% of NAND demand by 2030. Mizuho raises PTs on AMD to \$705 from \$580, DELL to \$650 from \$600, SNDK to \$2,050 from \$1,875, INTC to \$114 from \$92 and SMCI to \$43 from \$35.

Mizuho 表示, Muse 和 Dots 等全天候运行的智能体, 随着编排、工具调用和沙盒工作负载日益实现 7×24 小时运行, 可能推动 CPU 需求出现重大拐点; 智能体 CPU 的渗透率预计将从当前的 ~4% 升至 2030 年的 ~30%。其模型预计, 服务器 CPU 总潜在市场规模 (TAM) 将从 2026 年的 ~\$68B 增至 2030 年的 ~\$209B, 其中智能体 CPU 占 ~\$80B。AMD 是首选受益者; NVDA 独立 CPU 收入在 2027 年可能实现同比 >100% 增长; ARM 则将受益于 AGI CPU, 以及 Vera/Graviton/Axion/Cobalt 带来的版税收入。存储器同样受益, 智能体 AI 到 2030 年可能拉动 ~18% 的 NAND 需求。Mizuho 将 AMD 目标价从 \$580 上调至 \$705, 将 DELL 从 \$600 上调至 \$650, 将 SNDK 从 \$1,875 上调至 \$2,050, 将 INTC 从 \$92 上调至 \$114, 并将 SMCI 从 \$35 上调至 \$43。

MU: JPM management call reinforces much tighter CY27/28 supply, with Nov-Q GM floor + buyback pivot ahead

MU: JPM 管理层电话会进一步确认 CY27/28 供应将趋紧; Nov-Q 毛利率底部及回购策略转向在即

JPM says after a call with MU IR/Treasury, management expects CY27/28 to be materially tighter than CY26 as bit demand runs well above supply, with SCA demand exceeding what MU is willing to allocate and contracts already extending through 2031. CY27 HBM pricing is set significantly above CY26, while Nov-Q should mark the FY27 GM floor before pricing/mix drive expansion; management also expects to seek a materially larger buyback authorization near term. JPM stays OW/\$1,540.

JPM 表示，在与 MU IR/Treasury 通话后，管理层预计 CY27/28 将比 CY26 明显更加紧张，因为位元需求远高于供应，SCA 需求超过 MU 愿意分配的额度，且合约期限已延伸至 2031 年。CY27 HBM 定价将显著高于 CY26，而 11 月季度应是 FY27 毛利率的低点，之后定价/产品组合将推动毛利率扩张；管理层还预计近期将寻求大幅提高股票回购授权额度。JPM 维持 OW/\$1,540。

TSM / Samsung: Report points to another 8% 2nm price increase in Q1 – [EBN](#)

TSM / Samsung：报告称 Q1 将再上调 2nm 价格 8% – EBN

EBN reports, citing Taiwanese media, that TSMC plans an additional 8% increase in 2nm wafer prices for Q1 2027 after previously incorporating increases of roughly 20%. The report says TSMC's five 2nm fabs are operating at full capacity and production targets have risen 15–20%, yet customers including Google, Amazon, Qualcomm and AMD still face shortages. EBN says Samsung is seeking alternative-foundry business with its second-generation 2nm process, targeting yields above 70%.

EBN 援引台湾媒体报道称，TSMC 计划在此前已纳入约 20% 的涨幅后，于 2027 年 Q1 进一步上调 2nm 晶圆价格 8%。报道称，TSMC 的五座 2nm 晶圆厂均满负荷运转，产量目标已提高 15–20%，但包括 Google、Amazon、Qualcomm 和 AMD 在内的客户仍面临供应短缺。EBN 表示，Samsung 正以第二代 2nm 制程争取替代性晶圆代工业务，目标良率超过 70%。

TSM: GS raises PT to \$660/NT\$3,300, sees strong 2027 growth + higher CapEx on broader AI demand

TSM：GS 将目标价上调至\$660/NT\$3,300，预计 2027 年增长强劲，并因 AI 需求扩大而提高 CapEx

GS expects 2026/27 revenue growth of +42%/+36.9% y/y, with 3Q/4Q revenue +15.3%/+11.0% q/q as AI demand broadens across GPUs, ASICs, networking and increasingly server CPUs. GS raises 2027/28 CapEx to \$85B/\$98B from \$78B/\$82B, arguing supply remains insufficient despite expansion; near-term GM edges down to ~67.5%/67.3% on N2 ramp dilution. Reiterates Buy.

GS 预计 2026/27 年营收同比增长+42%/+36.9%，3Q/4Q 营收环比增长+15.3%/+11.0%，因为 AI 需求正扩展至 GPU、ASIC、网络设备，并日益延伸至服务器 CPU。GS 将 2027/28 年 CapEx 预期从\$78B/\$82B 上调至\$85B/\$98B，并指出尽管产能持续扩张，供应仍然不足；受 N2 爬坡稀释影响，近期 GM 略降至~67.5%/67.3%。重申买入评级。

META / MSFT: Cut internal Claude use as in-house tools gain share – [The Information](#) (out yesterday)

META / MSFT：随着内部工具份额上升，削减内部 Claude 使用量——The Information（昨日发布）

The Information reports Microsoft cut its projected annual internal spending on Claude by more than a third from at least \$1B, shifting staff toward GitHub Copilot and OpenAI models.

The Information 报道称，Microsoft 将其预计的 Claude 年度内部支出削减逾三分之一，此前该支出至少为\$1B；公司正引导员工转向 GitHub Copilot 和 OpenAI 模型。

NOK: CEO says supply constraints hold back twice the buildout pace – [CNBC](#)

NOK：CEO 称供应限制使建设速度未能达到原本的两倍——CNBC

CNBC reports Nokia CEO Justin Hotard said customers could build data centers twice as quickly without supply constraints, identifying memory chips and energy as major bottlenecks. Hotard said demand remains strong and the industry is still early in the buildout. He argued that existing AI capabilities alone could support another three years of deployment progress even without new frontier models, as businesses continue implementing technology already available.

CNBC 报道称, Nokia 首席执行官 Justin Hotard 表示, 如果不受供应限制, 客户建设数据中心的速度可提高一倍, 并指出存储芯片和能源是主要瓶颈。Hotard 表示, 需求依然强劲, 行业建设仍处于早期阶段。他认为, 即使没有新的前沿模型, 现有 AI 能力也足以支撑未来三年的部署进展, 因为企业仍在持续落地已经可用的技术。

AI VALUE CHAIN: Bernstein sizes next-gen AI racks at ~\$35-40B/GW

AI 价值链: Bernstein 估算, 下一代 AI 机架规模为 ~\$35-40B/GW

Bernstein estimates Vera Rubin at ~\$7.5M/rack, AMD MI455X ~\$7.3M, OpenAI Jalapeno ~\$5.0M/pod and TPU v7 Ironwood ~\$2.7M. Jalapeno has more scale-up networking/local HBM-DRAM and less scale-out/NAND than expected, implying higher supplier content. Bernstein also sees global GW deployments running above U.S. build estimates, suggesting international capacity is offsetting U.S. power/permitting delays.

Bernstein 估算, Vera Rubin 为~\$7.5M/机架, AMD MI455X 为~\$7.3M, OpenAI Jalapeno 为~\$5.0M/Pod, TPU v7 Ironwood 为~\$2.7M。Jalapeno 的纵向扩展网络和本地 HBM-DRAM 配置高于预期, 横向扩展和 NAND 配置则低于预期, 这意味着供应商可获得更高的单机内容价值。Bernstein 还认为, 全球 GW 级部署规模高于美国建设预估, 表明国际产能正在抵消美国电力和许可审批延误的影响。

ASML: BofA raises CY28 EPS 13% on higher ASPs/EUV units, PT to €2,557

ASML: BofA 因 ASP/EUV 出货量上调, 将 CY28 EPS 上调 13%, 目标价调至€2,557

BofA lifts CY28 revenue/EPS to €76.5B/€85.2 from €70.4B/€75.4B, driven by ~5% higher tool ASPs and EUV units rising to 120 from 110, partly offset by higher input costs. Every 5% ASP increase adds ~8% EPS with 2.5% cost pass-through, and BofA now sees ~50% EPS CAGR through 2028; reiterates Buy/Top Pick and raises PT to €2,557 from €2,452.

BofA 将 CY28 收入/EPS 预测从€70.4B/€75.4B 上调至€76.5B/€85.2B，受工具平均售价（ASP）提高~5%及 EUV 出货量从 110 台增至 120 台推动，部分被更高的投入成本抵消。ASP 每提高 5%，在成本传导率为 2.5%的情况下，EPS 将增加~8%；BofA 目前预计截至 2028 年的 EPS CAGR 为~50%；重申买入/首选评级，并将目标价（PT）从€2,452 上调至€2,557。

SOFTWARE

APP: Citi says eCommerce store growth accelerated through 3Q, with U.S. growth fastest in 3 months

APP: Citi 称电商商店增长在第三季度加速，美国增长达到三个月来最快

Citi says AppLovin reached ~15.7K eCommerce customers as of Oct. 2, +7.4% w/w, with 3Q weekly growth averaging ~3.1% and implying ~11.9K average stores for the quarter. U.S. stores rose +3.2% w/w, the fastest pace in three months, while international grew +15.3% led by Hong Kong/China, partly tied to dropshipping and ShopX. Store quality also improved modestly, with average rank moving to 404 from 414; Citi stays Buy.

Citi 称，截至 10 月 2 日，AppLovin 的电商客户达到~15.7K，环比增长 7.4%；第三季度周均增长率为~3.1%，意味着该季度平均商店数为~11.9K。美国商店环比增长 3.2%，为三个月来最快；国际市场增长 15.3%，由香港/中国领涨，部分与代发货和 ShopX 有关。商店质量也小幅改善，平均排名从 414 升至 404；Citi 维持买入评级。

S: FBN downgrades to SP/\$24 as valuation + scale gap vs. CRWD offset improving fundamentals

S: FBN 下调至跑输大盘（SP）/目标价\$24，因估值及规模差距相较 CRWD 抵消了基本面的改善

FBN says execution has improved, with FQ2 RPO +45% y/y, AI security ARR nearly tripling and NG operating margin reaching 10.5%, but shares now trade above its \$24 PT after more than doubling from April lows. FBN sees valuation as full at ~5.7x FY28

revenue/50x NG EPS, while SBC remains high at ~28–32% of revenue and CRWD/PANW's much larger scale supports better margins, reinvestment and incremental ARR capture.

FBN 表示，公司执行力有所改善，FQ2 RPO 同比增长 45%，AI security ARR 接近翻三倍，NG operating margin 达到 10.5%；但股价较 4 月低点已翻逾一倍，目前高于其\$24 PT。FBN 认为估值已充分反映预期，达到~5.7x FY28 revenue/50x NG EPS；与此同时，SBC 仍居高不下，占收入的~28–32%，而 CRWD/PANW 的规模大得多，因而能够实现更高利润率、加大再投资并获取更多增量 ARR。

NOW: UBS checks show stable demand + rising security opportunity, raises PT to \$150

NOW: UBS 渠道调研显示需求稳定、安全业务机会扩大，将 PT 上调至\$150

UBS says partner checks show healthy ServiceNow demand with some improvement, supporting modest +50bps increases to 3Q cRPO/subscription growth and a normal beat. AI adoption is progressing but spend remains early, while security/governance is emerging as a larger 2H26/2027 opportunity, particularly around AI Control Tower. UBS stays Neutral but raises PT to \$150 from \$110.

UBS 表示，合作伙伴调研显示 ServiceNow 需求稳健且有所改善，支持将 3Q cRPO/订阅收入增长预期小幅上调 50bps，并预计业绩将如常超预期。AI 应用正在推进，但相关支出仍处于早期阶段；与此同时，安全/治理正成为 2H26/2027 年更大的增长机会，尤其是 AI Control Tower 相关领域。UBS 维持 Neutral 评级，但将 PT 从\$110 上调至\$150。

NOW: Stifel checks point to ~22% cRPO vs. ~20% guide, raises PT to \$160

NOW: Stifel 渠道调研预计~cRPO 增长 22%，高于指引的~20%，将 PT 上调至\$160

Stifel's SI checks imply reported 3Q cRPO around 22% y/y cc, ~200bps above guide, though organic growth is closer to 19–19.5% after ~275bps of M&A contribution. Advanced-SKU upsell is gaining traction despite uneven Now Assist ROI, while a nine-

figure UK public-sector win offsets some U.S. federal noise; Stifel keeps Buy and raises PT to \$160 from \$120.

Stifel 的 SI 调研显示，报告的 3Q cRPO 同比按固定汇率计算约增长 22%，较指引高出 ~200bps；不过，剔除 ~275bps 的并购贡献后，有机增长更接近 19–19.5%。尽管 Now Assist 的投资回报率表现不一，高阶 SKU 的增购势头正在增强；一笔金额达九位数的英国公共部门订单也抵消了部分美国联邦业务的不确定性。Stifel 维持买入评级，并将目标价从 \$120 上调至 \$160。

WDAY: RBC sees Rising as AI proof-point catalyst, with Sana/Flex monetization the key debate

WDAY：RBC 认为 Rising 大会有望成为 AI 的验证催化剂，Sana/Flex 的商业化变现是关键议题

RBC says Workday Rising/10/13 analyst session could validate the AI story, with AI ARR ~\$600M (+>200% y/y), >5,500 customers using organic agents and AI attach rates >50% in 2Q. Key watchpoints are Flex Credit consumption/per-agent economics and Sana, where 12K internal users built ~22K custom agents in three weeks; RBC sees early traction as encouraging but wants proof AI spend can drive top-line acceleration without pressuring margins. Reiterates OP/\$240.

RBC 表示，Workday Rising/10/13 的分析师会议有望验证其 AI 故事：AI ARR 达到 ~\$600M（同比增长 >200%），超过 5,500 家客户正在使用原生智能体，且 2Q 的 AI 附加率 >50%。关键关注点包括 Flex Credit 的消耗情况及单智能体经济效益，以及 Sana——12K 名内部用户在三周内创建了 ~22K 个定制智能体。RBC 认为早期应用势头令人鼓舞，但仍希望看到证据，证明 AI 支出能够推动营收加速增长，同时不对利润率造成压力。重申 OP/\$240。

PANW: BTIG checks strongest across cyber, with FY27 confidence improving

PANW：BTIG 调研显示网络安全领域表现最强，对 FY27 的信心有所增强

BTIG says 7 partner checks representing ~\$1.5B of PANW sales were uniformly positive, with improving Q3 trends and several seeing 15%+ growth. Upside case is FQ1'27 revenue of ~\$3.37B (+17.1%) vs. Street ~\$3.31B and NGS ARR ~\$9.60B

(+33.9%) vs. ~\$9.54B. Buy/\$425.

BTIG 表示，7 家合作伙伴的调研反馈均积极，涉及 PANW 销售额~\$1.5B；Q3 趋势正在改善，其中几家增速超过 15%。乐观情景下，FQ1'27 营收为 ~\$3.37B (+17.1%)，高于华尔街预期的~\$3.31B；NGS ARR 为~\$9.60B (+33.9%)，高于~\$9.54B。买入/\$425。

NET: BTIG checks show broad acceleration, raises PT to \$413

NET：BTIG 调研显示业务普遍加速，将目标价上调至 \$413

BTIG says NET checks were consistently strong across app security, Workers AI, Magic WAN/SASE and bot management, with one large partner seeing meaningful September acceleration and another tracking mid-20s growth. Upside case is FQ3 revenue ~\$760M (+35.2%) vs. Street ~\$737M (+31.1%); BTIG now assumes 30%+ revenue CAGR through 2030. Buy, PT to \$413 from \$382.

BTIG 表示，NET 在应用安全、Workers AI、Magic WAN/SASE 和机器人管理领域的调研反馈一贯强劲；一家大型合作伙伴表示 9 月业务显著加速，另一家增速预计在 20%中段。乐观情景下，FQ3 营收为~\$760M (+35.2%)，高于华尔街预期的~\$737M (+31.1%)；BTIG 目前预计至 2030 年营收 CAGR 将超过 30%。买入，目标价由\$382 上调至\$413。

FTNT: BTIG sees demand improving beyond pricing/pull-forward

FTNT：BTIG 认为，需求改善并非仅由定价和提前拉货推动

BTIG says underlying demand is accelerating on AI infrastructure, firewall/SD-WAN refresh, OT and SSE, with one partner raising growth expectations to ~17% from 15% and another seeing ~30% growth. Upside case is product revenue ~\$780M (+39.5%) vs. Street ~\$728M and billings ~\$2.40B (+32.5%) vs. ~\$2.31B. Buy/\$203.

BTIG 表示，AI 基础设施、防火墙/SD-WAN 更新换代、OT 和 SSE 相关的潜在需求正在加速，一家合作伙伴将增长预期从 15% 上调至 ~17%，另一家则预计增长 ~30%。乐观情景下，产品收入为 ~\$780M (+39.5%)，高于华尔街预期的 ~\$728M；账单金额为 ~\$2.40B (+32.5%)，高于 ~\$2.31B。买入/\$203。

Cyber / SNOW / ASOS: ASOS drops 12.5% after app alert claims Snowflake breach – [The Standard](#)

Cyber / SNOW / ASOS: 应用通知声称 Snowflake 遭入侵后，ASOS 股价下跌 12.5%——《The Standard》

The Standard reports ASOS shares fell about 12.5% after customers received an app notification claiming attackers had compromised the retailer's Snowflake instance and threatening to leak data. ASOS had not confirmed the breach when the report was published, and its website and app remained operational. Security experts cited by the paper say the notification suggests access to connected systems, but does not establish the extent of any data breach; the notification system is separate from Snowflake.

《The Standard》报道，客户收到一则应用通知，声称攻击者已入侵这家零售商的 Snowflake 实例，并威胁泄露数据。此后 ASOS 股价下跌约 12.5%。报道发布时，ASOS 尚未证实发生数据泄露，其网站和应用仍正常运行。该报援引的安全专家表示，这则通知表明攻击者可能已访问与之连接的系统，但不能据此确定任何数据泄露的范围；通知系统与 Snowflake 相互独立。

INTERNET/OTHER

META: Wells raises PT to \$1,000 from \$796 despite FY27 EPS cut on Muse OpEx

META: Wells 将目标价从 \$796 上调至 \$1,000，尽管因 Muse 运营支出下调 FY27 每股收益预期

Wells cuts FY27 EPS 2.1% to \$31.18 as Muse pushes OpEx toward \$210–215B vs. Street \$202B and removes ~\$5B of high-margin capacity resale, but frames 2027 as a trough investment year analogous to 2022 Reels with AI monetization layering in from

2028. 3Q still looks clean at \$64.1B revenue/\$3.72 EPS, while FY27 CapEx rises to ~\$249B vs. Street ~\$194B; stays OW and raises PT to \$1,000.

Wells 将 FY27 EPS 下调 2.1% 至 \$31.18，因为 Muse 推动 OpEx 升至 \$210–215B，而市场预期为 \$202B，并取消了 ~\$5B 的高利润率产能转售；但其将 2027 年视为投资低谷年，类比 2022 年的 Reels，AI 变现将从 2028 年起逐步叠加。3Q 业绩仍显稳健，营收为 \$64.1B、EPS 为 \$3.72；FY27 CapEx 则升至 ~\$249B，高于市场预期的 ~\$194B。维持增持（OW）评级，并将目标价上调至 \$1,000。

VRSN: Baird keeps Fresh Pick as Informed adds another growth vector

VRSN: Baird 维持 Fresh Pick 评级，Informed 增添另一项增长动力

Baird highlights Verisign Informed, a real-time credential trust service entering beta now with GA targeted for 1H27, plus VRSN's application for the .pki TLD and potential additional gTLD bids. Alongside domain growth, .com pricing and .web, Baird sees five distinct growth vectors and views ~23.5x NTM FCF as inexpensive; VRSN remains a best idea/Fresh Pick.

Baird 着重介绍了 Verisign Informed，这是一项实时凭证信任服务，目前进入 beta 测试阶段，目标是在 1H27 正式推出；此外，VRSN 已申请 .pki 顶级域名（TLD），并可能进一步竞标其他通用顶级域名（gTLD）。除域名增长、.com 定价和 .web 外，Baird 认为公司拥有五项不同的增长动力，并认为 ~23.5x NTM FCF 的估值并不昂贵；VRSN 仍是首选标的/Fresh Pick。

CABLE: MoffettNathanson sees early signs broadband pricing is stabilizing after a brutal year

CABLE: MoffettNathanson 认为，经历惨淡的一年后，宽带定价初现企稳迹象

MoffettNathanson says U.S. broadband pricing may be stepping back from the brink after worsening ARPU pressure, aggressive FWA discounting and rising fiber competition. AT&T recently raised its 1-Gig promotional price by ~\$20/month in two steps, while Comcast and Optimum have pulled back promotions and T-Mobile ended

a recent offer, suggesting industry pricing discipline may be returning. The key debate is whether this marks a sustainable recovery or just post-quarter promotional normalization.

MoffettNathanson 表示，在 ARPU 压力加剧、FWA 大幅折扣促销以及光纤竞争日益激烈之后，美国宽带定价或许正从临界点回稳。AT&T 近期分两步将 1-Gig 促销价格上调~\$20/月，而 Comcast 和 Optimum 已收缩促销力度，T-Mobile 也结束了一项近期优惠，这表明行业定价纪律或正在恢复。关键争议在于，这是否意味着可持续复苏，还是仅仅是季度结束后的促销常态化。

AAPL: Bernstein tracker shows strong August iPhone growth, but early iPhone 18 demand mixed

AAPL：Bernstein 跟踪数据显示 8 月 iPhone 增长强劲，但 iPhone 18 初期需求喜忧参半

Bernstein says August global iPhone revenue grew +13% y/y on +7% units and +6% ASP, with iPhone 17 cumulative sales ~18% above the 16 series. However, initial iPhone 18 Pro/Max demand is mixed, including low-single-digit y/y declines in the U.S., and July/August FQ4 units are tracking modestly below expectations, partly offset by stronger premium mix/ASP. Bernstein sees limited incremental TSMC impact, while Sony looks better and QCOM/Largan face more pressure.

Bernstein 表示，8 月全球 iPhone 营收同比增长+13%，销量增长+7%，ASP 增长+6%；iPhone 17 累计销量比 16 系列~高出 18%。然而，iPhone 18 Pro/Max 初期需求喜忧参半，其中美国市场同比出现低个位数下滑；7 月/8 月 FQ4 销量略低于预期，部分被更强劲的高端机型销售组合/ASP 所抵消。Bernstein 认为 TSMC 受到的增量影响有限，Sony 表现较好，而 QCOM/Largan 面临更大压力。

AMZN: Susquehanna unBoxed checks positive on full-funnel ads, with agentic commerce more gradual than feared

AMZN：Susquehanna 对 unBoxed 的调研显示全漏斗广告表现积极，智能体商务的推进速度则较预期更为渐进

Susquehanna says after 24 partner checks at unBoxed, advertisers are increasingly

spending across sponsored search, AI shopping and DSP, with new Ads Agent/agentive products seen as incremental positives. Most checks expect humans to remain involved in higher-value purchases, making agentive commerce a gradual shift rather than near-term disruption; AMZN's data, merchant relationships and fulfillment network remain key advantages. Positive/\$325.

Susquehanna 表示，在 unBoxed 活动期间与 24 家合作伙伴交流后发现，广告主正越来越多地将支出投向赞助搜索、AI 购物和 DSP；新推出的 Ads Agent/智能体产品也被视为增量利好。多数受访者预计，在高价值购物中，人类仍将继续参与，因此智能体商务将是渐进式转变，而非近期颠覆；AMZN 的数据、商户关系和履约网络仍是关键优势。评级：Positive/目标价：\$325。

GOOGL: Makes changes to Gemini model access and limits (h/t Akh)

GOOGL：调整 Gemini 模型的访问权限并设限（致谢 Akh）

Changes to Gemini model access and limits

Important:

- For the best experience, make sure you've updated to the latest version of the Gemini mobile app.
- [Learn how to update Google Play apps for Android](#)
- [Learn how to update App Store apps for iOS](#)

Starting in October 2026, there will be changes to model availability for Gemini Apps when you use a personal account.

These changes will start to take effect for users without an AI subscription on October 9th. For users with an AI Plus subscription, you should receive an email that explains when these changes will take effect for you.

Model availability after these changes take effect:

	Gemini Model		
Google AI Plan	Flash-Lite	Flash	Pro

NEWS

TCEHY / DeepSeek: Funding expands to at least \$12B ahead of 2027 IPO – [Bloomberg](#)

TCEHY / DeepSeek：2027 年 IPO 前融资规模扩大至至少\$12B – Bloomberg

Bloomberg reports DeepSeek is close to raising at least RMB80B (\$12B), exceeding its

initial RMB50B target, with Tencent and CATL among the largest backers. Signed term sheets could take the final amount toward RMB100B as investor demand strengthened following its latest model release. The financing would precede restructuring for an IPO in early 2027. Bloomberg also reports DeepSeek plans to deploy at least 160,000 Huawei accelerators at its Inner Mongolia data center, potentially creating one of the largest known Huawei chip clusters.

Bloomberg 报道称，DeepSeek 即将完成至少 RMB80B（\$12B）的融资，超过最初 RMB50B 的目标，Tencent 和 CATL 是最大投资方之一。随着最新模型发布后投资者需求增强，已签署的投资意向书可能推动最终融资额升至 RMB100B。此次融资将先于公司为 2027 年初 IPO 进行重组。Bloomberg 还报道称，DeepSeek 计划在其内蒙古数据中心部署至少 160,000 颗 Huawei 加速器，有望建成已知规模最大的 Huawei 芯片集群之一。

Moonshot / BABA / TCEHY: Valuation reaches \$50B ahead of Q1 IPO; ARR seen doubling – [Bloomberg](#)

Moonshot / BABA / TCEHY: Q1 IPO 前估值达到\$50B；预计 ARR 翻倍 – Bloomberg

Bloomberg reports Moonshot completed its final private funding round at roughly a \$50B valuation, up from \$31.5B this summer, and is targeting a Hong Kong IPO in Q1 2027 that could raise up to \$5B. Early investor meetings may begin this month. Sources expect ARR to reach \$2B by December from \$1B currently and \$300M in June. The Alibaba- and Tencent-backed company has filed confidentially; Bloomberg notes China's data-security investigation into Moonshot and DeepSeek could affect the timetable or valuation.

据 Bloomberg 报道，Moonshot 已完成最后一轮私募融资，估值约为 500 亿美元，高于今年夏季的 315 亿美元，并计划于 2027 年第一季度在香港 IPO，募资额最高可达 50 亿美元。与早期投资者的会面可能于本月启动。消息人士预计，其 ARR 将从目前的 10 亿美元及 6 月的 3 亿美元增至 12 月的 20 亿美元。这家由 Alibaba 和 Tencent 支持的公司已秘密提交上市申请；Bloomberg 指出，中国对 Moonshot 和 DeepSeek 展开的数据安全调查可能影响上市时间表或估值。

Reflection / NVDA: Beam launches to compete with Chinese open models – [Reuters](#)

Reflection / NVDA: Beam 发布，旨在与中国开放模型竞争 – Reuters

Reuters reports Nvidia-backed Reflection AI released Beam, its first open-weight model, targeting coding and agentic tasks served by Chinese competitors such as DeepSeek and Kimi. Reflection says Beam is competitive with Z.ai's GLM-5.2 and approaching Qwen3.8-Max on those tasks. The model has 501B total parameters but activates 23B per task to reduce computing requirements. Reuters notes Reflection has secured additional compute from SpaceX's Colossus 2 facility.

据 Reuters 报道，Nvidia 支持的 Reflection AI 发布了首款开放权重模型 Beam，瞄准编程和智能体任务，与 DeepSeek 和 Kimi 等中国竞争对手展开竞争。Reflection 表示，Beam 在这些任务上的表现可与 Z.ai 的 GLM-5.2 媲美，并接近 Qwen3.8-Max。该模型总参数量为 501B，但每项任务仅激活 23B 参数，以降低计算需求。Reuters 指出，Reflection 已从 SpaceX 的 Colossus 2 设施获得额外算力。

OpenAI: UAE funds discuss up to \$10B contribution to new round – [Bloomberg](#)

OpenAI: 阿联酋基金商讨向新一轮融资出资最多 \$10B – Bloomberg

Bloomberg reports UAE investors including MGX are discussing a syndicate that could contribute as much as \$10B to OpenAI's planned funding round of at least \$30B. BlackRock is also in talks, alongside existing investors including the University of California endowment, Thrive Capital and Andreessen Horowitz. OpenAI is presenting a \$1.4T pre-money valuation as a fixed price despite not yet securing a lead investor. The financing follows its decision to defer an IPO until at least next year.

Bloomberg 报道称，包括 MGX 在内的阿联酋投资者正在商讨组建一个投资财团，计划向 OpenAI 拟议的至少 \$30B 融资轮出资最多 \$10B。BlackRock 也在洽谈之列，现有投资者还包括加州大学捐赠基金、Thrive Capital 和 Andreessen Horowitz。尽管尚未敲定领投方，OpenAI 仍将 \$1.4T 的融资前估值作为固定价格提出。此次融资是在 OpenAI 决定将 IPO 推迟至至少明年之后进行的。

GOOGL / PCB / CCL: TPU upgrades drive higher board content and material prices – [Commercial Times](#)

GOOGL / PCB / CCL: TPU 升级推动单板价值量和材料价格上涨 – Commercial Times

Commercial Times reports high-end copper-clad laminate prices have risen 50–100% this year as TPU upgrades increase board complexity and materials remain scarce. It cites Aletheia forecasting Google TPU shipments of 3.6M in 2026, 8.5M in 2027 and 12M in 2028, with additional CCL price rounds of 10–15% through the first half of 2027. Aletheia estimates PCB content of \$30,000–40,000 per TPU V8 rack and CCL content of \$12,000–18,000, with the move to HDI in HumuFish potentially adding another 40–50% to those values.

Commercial Times 报道称，今年高端覆铜板价格上涨了 50–100%，原因是 TPU 升级提升了电路板复杂度，同时材料供应仍然紧张。报道援引 Aletheia 的预测称，Google TPU 出货量将在 2026 年达到 3.6M，2027 年达到 8.5M，2028 年达到 12M；到 2027 年上半年，覆铜板价格还将有数轮 10–15% 的涨价。Aletheia 估算，每个 TPU V8 机柜的 PCB 价值量为 \$30,000–40,000，覆铜板价值量为 \$12,000–18,000；HumuFish 转向 HDI 后，这些价值量还可能再增加 40–50%。

Aspeed / AI Servers: Q3 beats guidance; analysts see roughly 40% Q4 growth – [Commercial Times](#)

Aspeed / AI 服务器：Q3 业绩超出指引；分析师预计 Q4 增长约 40% – Commercial Times

Commercial Times reports Aspeed's Q3 revenue reached NT\$4.786B, up 23.6% sequentially and 105.4% YoY, above its NT\$4.1–4.3B guidance as server-management

chip demand stayed strong. Analysts cited by the paper forecast NT\$6.6–6.8B in Q4 revenue, up 38–42% sequentially, and 67–68% gross margins. Chairman Chris Lin said supply bottlenecks began easing in Q3 and should improve more noticeably in Q1 2027; orders already on hand for next year exceed this year's full-year revenue. The paper also reports expected Q4 price increases and further AST2700 volume growth.

据《Commercial Times》报道，Aspeed Q3 营收达 NT\$4.786B，环比增长 23.6%，同比增长 105.4%，高于 NT\$4.1–4.3B 的指引，服务器管理芯片需求依然强劲。该报援引的分析师预测，Q4 营收将达 NT\$6.6–6.8B，环比增长 38–42%，毛利率为 67–68%。董事长 Chris Lin 表示，供应瓶颈自 Q3 起开始缓解，预计到 2027 年 Q1 将有更明显改善；目前已接获的明年订单金额已超过今年全年营收。该报还称，预计 Q4 将涨价，且 AST2700 出货量将进一步增长。

Samsung Electro-Mechanics: Customers back \$5B substrate expansion – [DigiTimes](#) / [The Elec](#)

Samsung Electro-Mechanics：客户支持 50 亿美元基板扩产计划 – DigiTimes / The Elec

DigiTimes reports customers are providing funding and long-term volume commitments for Samsung Electro-Mechanics' KRW6.78T (\$5B) FCBGA expansion in Korea and Vietnam. Its substrate utilization reached 89% in the first half, versus 70% last year; new Korean production is scheduled for September 2028 and Vietnam for June 2030. DigiTimes cites TrendForce putting September ABF-substrate lead times at 48–56 weeks, versus roughly 12 in a balanced market. Separately, The Elec reports a new KRW285.6B AI-server MLCC order for 2027, bringing Samsung Electro-Mechanics' six disclosed component supply contracts this year to about KRW3.9T.

DigiTimes 报道称，客户正在为三星电机在韩国和越南扩建 FCBGA 产能提供资金，并承诺长期采购。该项目投资额为 KRW6.78T（\$5B）。上半年其基板产能利用率达到 89%，高于去年的 70%；韩国新产线计划于 2028 年 9 月投产，越南则计划于 2030 年 6 月投产。DigiTimes 援引 TrendForce 的数据称，9 月 ABF 基板的交货周期为 48–56 周，而市场供需平衡时约为 12 周。另据 The Elec 报道，三星电机获得一笔面向 2027 年的新 AI 服务器 MLCC 订单，金额为 KRW285.6B；这使其今年已披露的六项元件供货合同总额达到约 KRW3.9T。

LG Electronics / Cooling: Signs 5GW North American data-center supply agreement – [The Elec](#)

LG 电子 / 制冷：签署 5GW 北美数据中心供货协议 – The Elec

The Elec reports LG Electronics signed a definitive long-term chiller supply agreement with Air Control Concepts covering a total 5GW of AI data-center cooling projects in the US and Canada. LG will supply chillers and related cooling systems progressively through the infrastructure platform, whose AMC subsidiary develops large data-center projects. The report says LG already began supplying cooling systems this year for a major North American AI data-center project won in 2025.

据《The Elec》报道，LG Electronics 与 Air Control Concepts 签署了一项具有约束力的长期冷水机组供应协议，覆盖美国和加拿大总规模达 5GW 的 AI 数据中心制冷项目。LG 将通过其基础设施平台逐步供应冷水机组及相关制冷系统；该平台旗下子公司 AMC 负责开发大型数据中心项目。报道称，LG 已于今年开始为一个于 2025 年中标的北美大型 AI 数据中心项目供应制冷系统。

APP: San Diego alleges child tracking and explicit ad targeting – [Bloomberg](#)

APP：圣迭戈指控其追踪儿童并向其投放露骨广告——彭博社

Bloomberg reports San Diego County sued AppLovin, alleging it bypassed parental controls and tracking opt-outs to collect children's sensitive data and serve ads for adult content, alcohol and vaping in games. The complaint alleges device fingerprinting circumvented Apple and Google protections without parental consent. Bloomberg notes the action follows the SEC's closure of its separate advertising-practices investigation without recommending enforcement, according to AppLovin's CFO in August.

彭博社报道称，圣迭戈县起诉 AppLovin，指控其绕过家长控制和拒绝追踪选项，收集儿童敏感数据，并在游戏中投放成人内容、酒精饮料和电子烟广告。诉状指称，该公司未经家长同意，通过设备指纹识别规避了 Apple 和 Google 的保护措施。彭博社指出，此次诉讼发生在 SEC 结束其另一项针对 AppLovin 广告行为的调查、且未建议采取执法行动之后；AppLovin CFO 于 8 月作出了上述说明。
