Goldman Sachs & Co. LLC

We introduce the fifth edition of our Ten Ideas report, where we highlight stocks with compelling risk/reward from current levels into year-end. The ideas cut across four key investment themes where we have conviction:

- First, we see room for continued momentum across the Oil E&P complex and highlight **ConocoPhillips (COP)**, **Occidental Petroleum (OXY)** and **Permian Resources (PR)** as stocks where we have a constructive outlook on long-term FCF per share growth and see tactical rate of change for near-term cash flow generation given the recent recovery in Permian gas pricing.
- Second, we continue to hold a constructive view on the power and LNG thematics across the US and look for select stocks that are well-positioned to capture incremental value. We highlight **Quanta Services (PWR)**, **Duke Energy (DUK)**, **Baker Hughes (BKR)** and **Golar LNG (GLNG)** on this basis.
- Third, we remain bullish on Refining. While the stocks have performed well year-to-date, we highlight room for positive estimate revisions and see more room for upside from select SMID Cap refiners, so we highlight **HF Sinclair (DINO)** as a beneficiary.
- Fourth, we see attractive risk/reward skew for select stocks in natural gas upstream and midstream, as the current weakness in sentiment is creating strong entry points for high-quality names. We highlight **TC Energy (TRP)** and **Antero Resources (AR)** on this basis.

Please see within for further details.

Note: Occidental Petroleum is on the Americas Conviction List, compiled by our Investment Review Committee.

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

Ten Energy Ideas We Are Constructive On (Sorted By Market Cap)

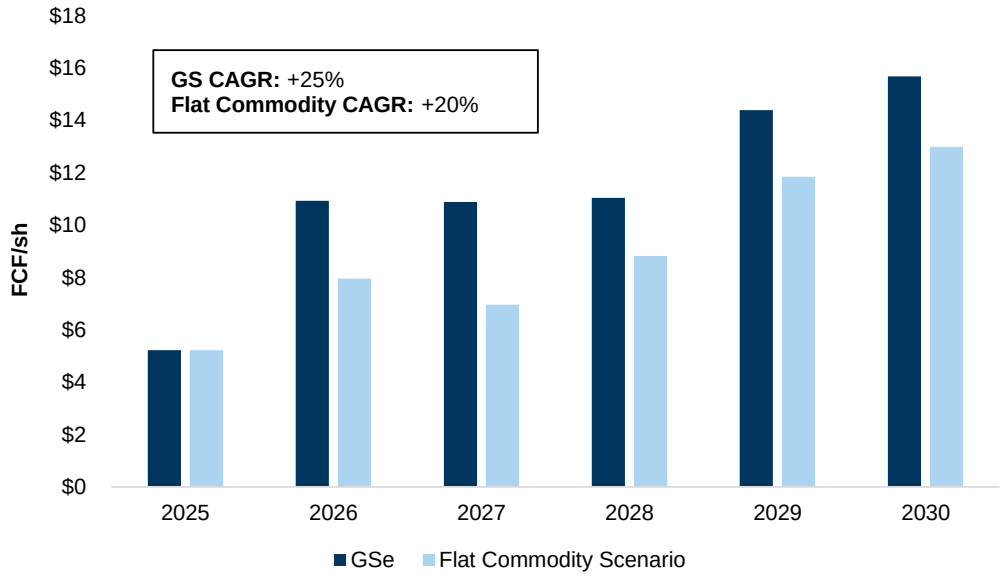

Stock 1: ConocoPhillips (COP)

What are the key drivers of your investment thesis and what will support share performance from here?

Our core investment thesis remains intact under the new leadership, with shares still set to benefit from a $7 bn free cash flow inflection as four major growth projects (NFE, NFS, Port Arthur, and Willow) come online, alongside $1 bn in cost reductions. We expect this growth pipeline to drive a 20%-25% free cash flow per share CAGR at a long-term Brent price of $75/b, while also backing a strong return of capital framework that targets 45% of cash from operations to shareholders through the cycle, though distributions should trend closer to 50% in 2H26 to offset a softer 1H26. In a challenging geopolitical environment, we highlight advantaged OECD exposure across Alaska, Canada, and particularly the Lower 48, where productivity and capital efficiency improvements continue to support low-single digit year-over-year production growth. We see room for shares to catch up after underperforming peers over the past month and estimate approximately 15% total return potential from current levels over the next year. From here, we expect investors to keep a close eye on near-term operational milestones including the next winter construction season and summer sea lift of processing modules at Willow. While Qatar is a key area of uncertainty, we expect production to trend higher quarter-over-quarter, with the first train from NFE on track for startup in early 2027, in our view.

Exhibit 2: We expect strong free cash flow per share (FCF/sh) growth from 2025-30, estimating a CAGR of 25% in our assumed commodity price environment and 20% in a constant commodity price scenario

Source: Goldman Sachs Global Investment Research

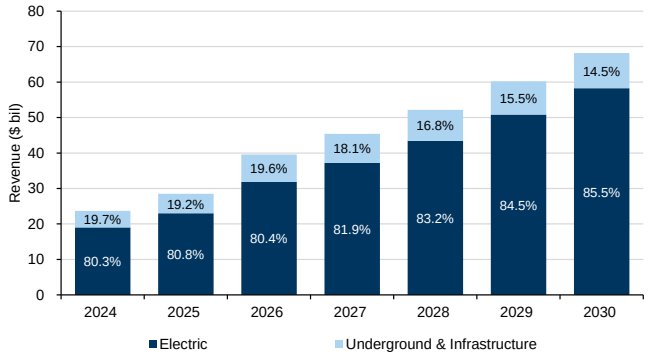

Stock 2: Quanta Services (PWR)

What are the key drivers of your investment thesis and what will support share performance from here?

We continue to highlight PWR where we see ~32% upside within our Energy Services coverage, as we view the stock as a key beneficiary of the build out of the grid and data centers over the next several years. PWR remains one of the largest companies in the Specialty Contractor space due to its expertise of constructing and installing grid infrastructure. We continue to see higher utility spending for the build out of transmission & distribution lines, along with power generation, as long-term earnings drivers for PWR. The inclusion of large transmission projects such as 765 kV lines over the next several years remains a key driver of the stock, as we estimate the company to work on several large projects in addition to their base grid EPC work. As a result, we see the Electric business comprising ~80% of total company revenue. We also see the company's focus on data center infrastructure as a driver of long-term earnings momentum, as management has noted an increasing focus on providing an integrated solution for hyperscaler customers, similar to its approach in the utility business. With the acquisitions of multiple businesses over the past few years such as Cupertino, Dynamic Systems, and Tri-City, we see PWR as well-positioned to provide offerings across the value chain for the construction and connection of data centers. As the company builds out the relationships with hyperscalers, we anticipate margin expansion from current levels, with support from the expansion of its offsite manufacturing capabilities and pre-fabrication offerings.

知识星球：前沿信息收录

Exhibit 3: We estimate a ~15% revenue CAGR through 2030 for PWR
We see earnings growth driven by the company's exposure to the grid and data center build out

Source: Company data, Goldman Sachs Global Investment Research

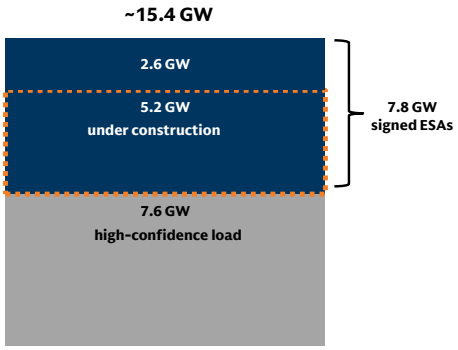

Stock 3: Duke Energy (DUK)

What are the key drivers of your investment thesis and what will support share performance from here?

Amidst current election risk, we remain constructive on Duke Energy (DUK, Buy) which we view as relatively more insulated within our coverage with no gubernatorial race in North Carolina, its largest jurisdiction. We see solid fundamentals for DUK with a strong catalyst path moving forward where we would highlight three things: (1) DUK operates in a favorable regulatory environment in the Southeast where it is currently derisking its regulatory calendar with two settlements proposed at DEC and DEP, (2) the company has improved its balance sheet positioning where it is on target for ~14.5% FFO/Debt in 2026, targeting 15% over the long term, and (3) rising load growth in DUK's service territories is driving upside to EPS if it can convert its ~15.4 GW high confidence pipeline (of which ~7.8 GW is under signed ESAs with ~5.2 GW under construction). Progress on eliminating the regulatory overhang, executing on the balance sheet, and continuing to serve growing data center demand, gives us confidence in the potential for management to raise earnings guidance on the 4Q call above its current 5%-7% range. With Street expectations being low on the higher EPS growth outlook where they are forecasting an EPS CAGR of ~7% vs. GSe at ~8%, we see higher support for share performance from here. The stock (-12%) has performed in-line with the XLU (-11%) in the past 6-months, reflecting elevated risk around the elections and the current rate environment with the 10-year treasury yield having increased ~14% within the same time frame. We view valuation as attractive at these levels with the stock trading at ~16x P/E on our 2027 estimates, in-line with our coverage average (ex. CA), despite having less exposure to election risk and having a solid catalyst path ahead. For further details, find our latest note here.

Exhibit 4: We view DUK as well positioned to contract additional load in its ~15.4 GW high-confidence pipeline
DUK's high-confidence data center pipeline

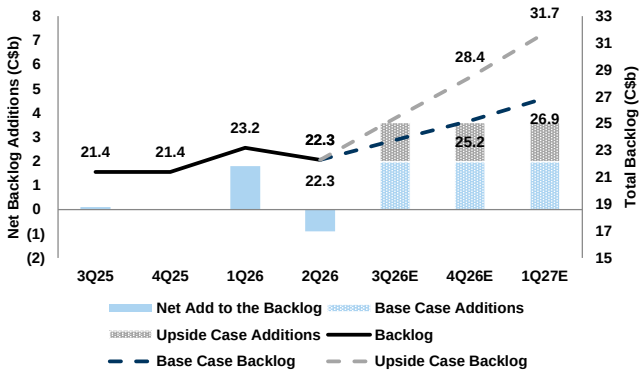

Source: Company data, Goldman Sachs Global Investment Research

Stock 4: TC Energy (TRP)

What are the key drivers of your investment thesis and what will support share performance from here?

We are constructive on TRP, particularly following the stock's recent pullback, for three key reasons. First, we expect TRP to announce further US natural gas pipeline projects over the coming quarters as it executes on its pre-FID backlog, with potential supplementing growth projects on its Canada gas footprint (although likely at more modest returns given its more regulated contract structure). Second, we see increasing visibility into growth over the next decade, both from further gas pipeline projects and its large potential nuclear expansion project in Ontario. Third, we are more comfortable with TRP's funding outlook as better EBITDA growth has increased financial flexibility, supporting potentially higher capex levels and thus potentially upside to our ~6% EBITDA CAGR 2025-2032E (we are ~1% above FactSet consensus through 2030). We valuation as compelling following recent underperformance (TRP -9% vs AMNA -2% in the trailing three months). For more details, please see our recent upgrade here.

Exhibit 5: We estimate there is C$6-11b of remaining capex capacity through 2030E, which could be formally sanctioned in the upcoming months, per management...
TRP Project Backlog - Net Adds vs Total Size (C$m)

Source: Company data, Goldman Sachs Global Investment Research

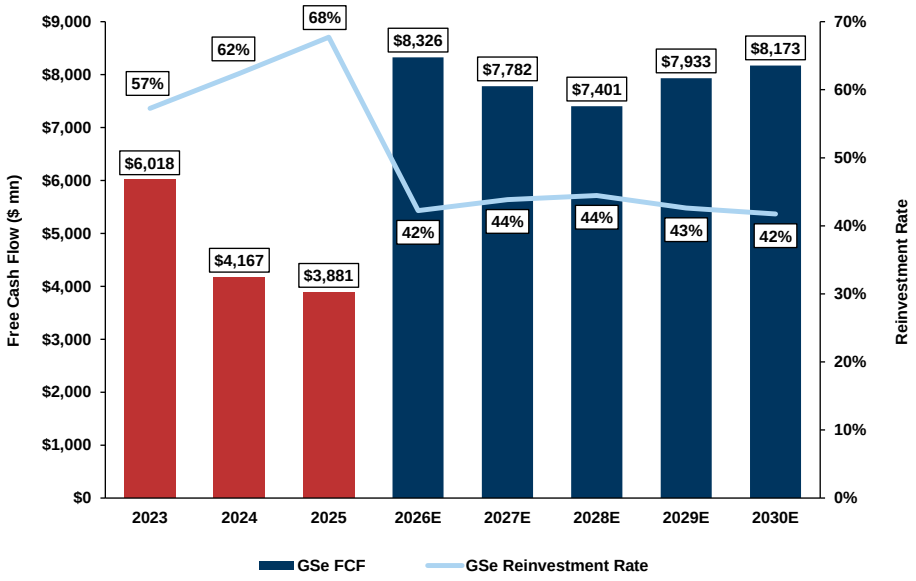

知识星球：前沿信息收录
VX:FCCNN88

Stock 5: Occidental Petroleum (OXY)

What are the key drivers of your investment thesis and what will support share performance from here?

We remain constructive on OXY following our recent upgrade to Buy from Neutral on August 30 with 20% total return to our $69 price target at current levels. Additionally, OXY was included in the latest iteration of the America's Conviction List compiled by our Investment Review Committee. We see OXY trading at an attractive 13% FCF yield on average 2027/2028 estimates relative to large cap peer average of 11% (peers include DVN, FANG, EOG, and COP). Following a period of resource expansion from 2019-2024 for OXY, the stock has lagged peers given the company's higher reinvestment rate and leverage. Following 12-month underperformance (OXY 28% vs XLE 42% vs oily E&P average 42%), we see a leadership team focused on operational execution, improving cost efficiencies, lowering base declines, and delivering against sustainable cash flow improvement targets. Alongside 2Q26 results, OXY rolled out a cash flow improvement plan targeting $4.0 bn of incremental sustainable cash flow by 2030 through corporate cost reductions, capital and midstream efficiencies, and operational improvements. We also see further upside potential driven by the company's differentiated approach to advanced recovery, with management highlighting >4 BBOE of resource opportunity across conventional and unconventional assets that can support this cash flow improvement plan. Moreover, OXY has made meaningful progress deleveraging the balance sheet with a clear line of sight to achieving its principal debt target of $10.0 bn in early 2027, driving capacity for upside potential to shareholder returns alongside the company's outlook to build cash on the balance sheet.

Exhibit 6: We see an inflection in OXY's FCF driven by a sustainably lower reinvestment rate relative to historical levels
OXY free cash flow and reinvestment rate over time

Source: Company data, Goldman Sachs Global Investment Research

Stock 6: Baker Hughes (BKR)

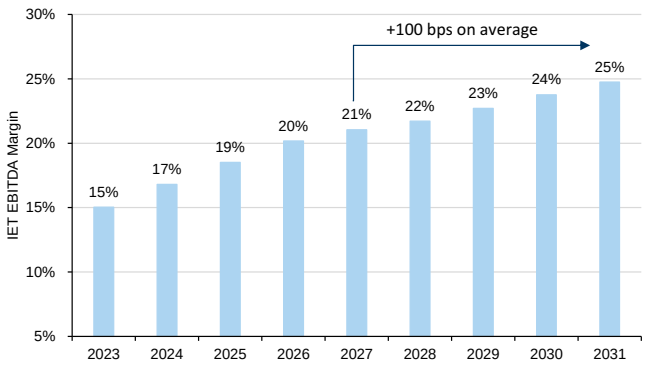

What are the key drivers of your investment thesis and what will support share

知识星球：前沿信息收录
VX:FCCNN88

performance from here?

For Baker Hughes, we reiterate our Buy rating on the stock, where we see ~24% upside to current levels. We see earnings strength driven by growth opportunities with the integration of Chart Industries, strong IET order momentum, and durable earnings growth in OFSE. While we are mindful of the softer than anticipated Chart guidance, we see upside over the long-term as Baker capitalizes on geographical and operational synergies, particularly from Chart's aftermarket services business. We believe the inclusion of complementary products, particularly within the LNG and power equipment value chain, supports a better integrated offering and is a growth driver for the company's industrial business. As a result, we estimate strong margin growth within BKR's standalone IET business through 2031, with additional margin expansion in the Chart segment. We additionally see BKR's OFSE business driving value for the stock over time, as the company has become increasingly levered to production-oriented oilfield services work, which we see as a more defensive earnings profile within oilfield services. As we continue to anticipate activity additions outside the Middle East over the next several years, we see BKR as positioned to drive incremental revenue and margin growth in the business, providing additional earnings power.

Exhibit 7: We estimate IET to achieve ~25% EBITDA margins by 2031 driven by backlog conversion and incremental aftermarket services revenue
We see potential for increasing power related work as well as aftermarket services to support margin expansion

Source: Company data, Goldman Sachs Global Investment Research

Stock 7: HF Sinclair (DINO)

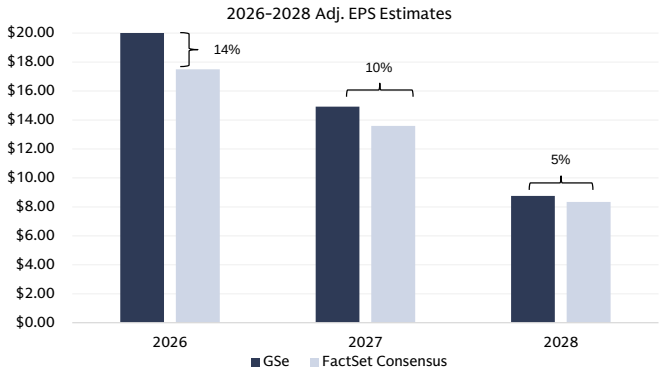

What are the key drivers of your investment thesis and what will support share performance from here?

While we are mindful of YTD outperformance across the refining complex more broadly, we continue to see room for positive consensus estimate revisions from here, particularly for HF Sinclair (DINO), supported by tight global refining fundamentals and capital discipline among the group which we expect to drive share performance. For DINO, we highlight the company's exposure to niche refining markets (the Rockies and Mid-Con), robust non-refining earnings contributions, balance sheet strength, and SRE optionality. Furthermore, we continue to see value in management's ongoing commitment to improving refining operations where we point towards DINO's crude slate optionality and jet fuel flexibility projects, which should support margin realizations and earnings. As a result, we find the free cash flow profile of the business as

知识星球：前沿信息收录
VX:FCCNN88

compelling where we see the stock trading at an ~11%/~6% yield in 2027/2028, respectively. From here, we continue to look for updated company commentary around (a) capital allocation priorities, (b) the upcoming CEO/CFO transition, (c) the company's midstream growth projects, and (d) small refinery exemptions on the go-forward.

Exhibit 8: We continue to see room for positive estimate revision potential for FactSet consensus Adj. EPS in 2026-2028, which we expect will support equity performance from here

Source: FactSet, Company data, Goldman Sachs Global Investment Research

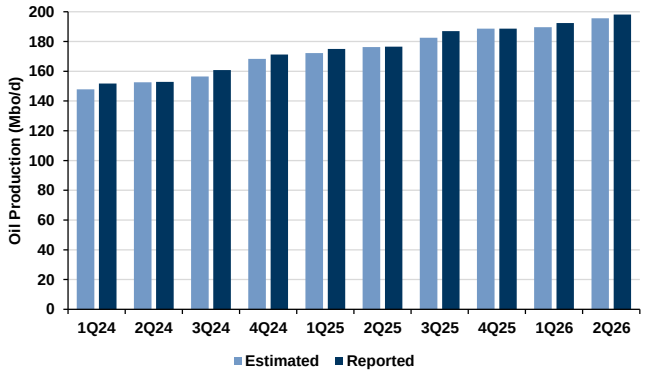

Stock 8: Permian Resources (PR)

What are the key drivers of your investment thesis and what will support share performance from here?

While PR has outperformed peers year-to-date at 55% vs oily peers at 43%, we remain constructive on the company's outlook for continued quarterly execution and see 25% total returns at current levels. We see PR growing FCF per share at a ~20% CAGR from 2025-2028 driven by incremental efficiencies across its operating program and a shift toward more oil-focused production that supports higher free cash flow generation over time, with upside potential stemming from improvement in regional Waha gas pricing and continued execution of the ground game strategy (Exhibit 9). Year-to-date, we have seen PR deliver on quarterly operations as the company has beat on oil production and raised FY guidance during both 1Q26 and 2Q26 earnings, as well as execute on the ground game strategy with $1.05 bn in bolt-on transactions YTD as of 2Q26 earnings results. As we screen for idiosyncratic opportunities across our oily E&P coverage, we see compelling risk/reward skew for PR with a 16% FCF yield on average 2027/2028 estimates relative to oily peers at 13% (peers include FANG, EOG, DVN, and OVV). Additionally, we seek more clarity on the company's outlook for organic oil production growth and the Waha pricing environment in 2027, as the current macro environment remains supportive of PR's medium term cash flow generation outlook in addition to the organic improvements and inorganic growth the business expects to execute on.

VX:FCCNN88

Exhibit 9: PR has continued to outperform production estimates QoQ
Oil Production (Mbo/d) Consensus vs Reported

Source: Goldman Sachs Global Investment Research, FactSet

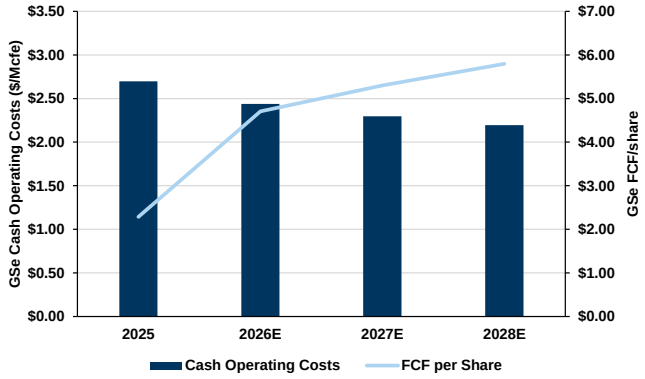

Stock 9: Antero Resources (AR)

What are the key drivers of your investment thesis and what will support share performance from here?

We highlight AR with a 12-month price target of $46 representing 29% total return to shares at current levels, as we see this business driving meaningful margin enhancement through 2028 with its target to reach $2.00/Mcfe in cash costs by YE2028 relative to $2.70/Mcfe in 2025, and valuation at discounted levels relative to peers despite an elevated liquids pricing environment and relative outperformance year-to-date (AR +3% vs Gas E&Ps -13%). We hold a constructive view on AR's incremental dry gas production growth and cost synergies stemming from the HG Energy transaction, and note AR's execution of additional bolt-on transactions with $315 mn in bolt-ons completed in 2Q26. Furthermore, we see AR's expectations to unwind costly firm transport agreements as a positive tailwind to drive $300 mn in margin improvement and continued FCF per share growth through YE2028. Beyond 2028, the company noted these improvements could grow to $600-$700 mn in savings over the following several years as the agreements continue to unwind. AR's valuation is currently discounted at current levels with a 14% FCF yield on average 2027/2028 estimates relative to Appalachian peer average at 9% (peers include EQT, RRC, EXE, NFG). From here, we seek more clarity on AR's outlook for executing on incremental commercial supply agreements with power and data center developments, as well as updates regarding the company's outlook for production volume growth in 2027 given the continued weakness in the natural gas pricing environment.

知识星球：前沿信息收录
VX:FCCNN88

Exhibit 10: We see material improvement to AR's cost structure driving FCF per share growth through 2028
GSe cash operating costs ($/Mcfe) and FCF per share over time for AR

Source: Company data, Goldman Sachs Global Investment Research

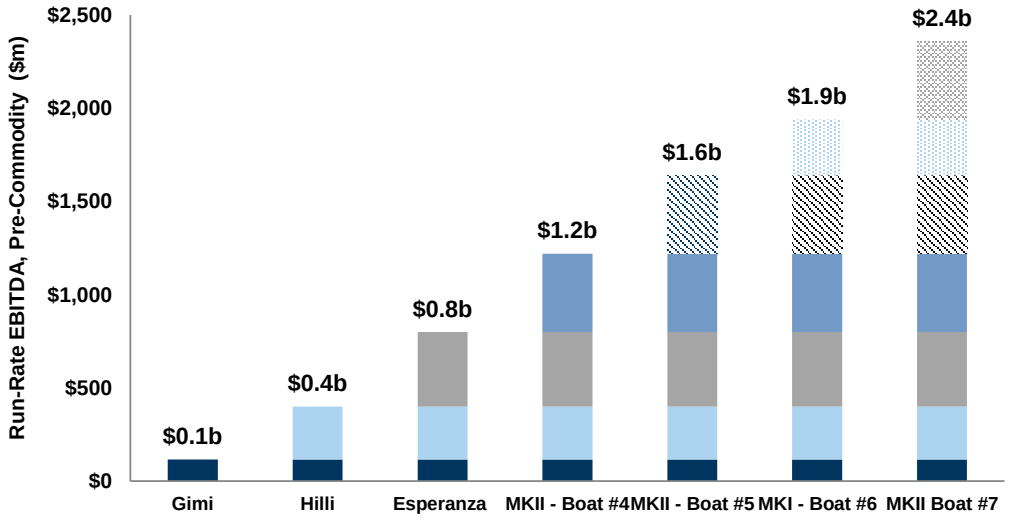

Stock 10: Golar LNG (GLNG)

What are the key drivers of your investment thesis and what will support share performance from here?

We are constructive on GLNG, as we continue to see a near-term catalyst path for both positive operational and organic growth updates as well as the ongoing strategic review as underappreciated. On the current footprint, we see a clear line of sight to executing ~$1.2b of run-rate EBITDA by ~2030 (ex-commodity adjustments), which is significant growth relative to 2025 of ~$260m. Looking forward, we are constructive on the company's ability to announce a commercial contract for the recently FID'ed fourth vessel in the near-term, particularly as LNG buyers seek to diversify LNG supply portfolios away from the Middle East amid ongoing supply disruptions. In our view, the commercialization of the fourth vessel is an important milestone not only for derisking the on-spec development of the fourth boat, but also for read-throughs on GLNG's ability to FID a fifth vessel thereafter. On that point, we see GLNG's shipyard slot options for pre-FID boast #5-7 as underappreciated; for context, every MKII vessel could add ~$400m of run-rate EBITDA, on our math. Elsewhere, we will monitor other catalysts including the ability for GLNG to crystalize value from its contractual commodity price exposure upside from the Argentina assets over time. Separately, we will continue to monitor updates on the formal strategic review, which is focused on accelerating the growth pipeline of FLNG vessels and maximizing shareholder value (and could include a sale of the company, per management). For more details, please see our latest note here.

Valuation & Key Risks

COP. We are Buy-rated on COP, and our 12-month P/E, EV/DACF, and DCF-based price target is $146. Our valuation blends an 85% fundamental value of $142 (based on $80/$75 Brent and $3.50/$3.50 Henry Hub in 2027/2028) and a 15% M&A theoretical value of $166, derived by applying increased oil and natural gas price estimates of $85/$80 Brent and $3.75/$3.75 Henry Hub in 2027/2028. Key risks relate to commodity prices, capital spend, and operational execution.

PWR. Our 12-month price target is $902, which reflects our target 30.0x NTM EV/EBITDA multiple. We are Buy-rated on PWR. Key Risks: 1) slower revenue CAGR across segments from loss in project volume momentum, 2) delays in project deliverables from supply chain related challenges, and 3) slower margin progression across the three segments from cost inflation or other operational challenges.

DUK. We are Buy rated on DUK and see 18% total return to our 12-month, $147 price target which is based on a P/E multiple of 19.5x on our Q5-Q8 estimates to capture the upside opportunities around generation capex and improved regulatory position. Key downside risks include: DUK's balance sheet not improving; regulatory uncertainty from recently filed rate case; and any decline in the strong load growth forecast impacting expected earnings growth.

TRP/TRP.TO. We are Buy rated with a 12-month C$101/US$71 price targets based on 14.75x EV/EBITDA. Downside risks to our thesis include: Higher regulatory hurdles for natural gas pipeline projects, slower than expected execution on new gas transmission projects, lower than expected returns on gas transmission projects, higher than expected capex on sanctioned projects, high-multiple bolt-on M&A, lower than expected rate case outcomes, and higher interest rates.

知识星球：前沿信息收录
VX:FCCNN88

OXY. We are Buy rated on OXY with a 12-month price target of $69 using a target free cash flow yield of 11.0% on average 2027/2028 estimates with $80/$75 per bbl Brent oil price and $3.50/$3.50 per MMBtu Henry Hub gas price. We apply an M&A rank of 2 for the stock with an 85% weight to a fundamental valuation of ~$67 and a 15% weight to an M&A theoretical valuation of ~$78 based on $85/$80 per bbl Brent oil price and $3.75/$3.75 per MMBtu Henry Hub gas price for 2027/2028. Key downside risks include higher operating costs, negative well results, weak production/capex execution, higher commodity prices and government pronouncements.

BKR. Our 12-month PT of $71 is based on an average of two methodologies. We apply an 11.0x through cycle EV/EBITDA multiple and an 5.5% through cycle free cash flow yield. Key risks: 1) Slower pace of LNG FIDs, 2) slower turbine orders, 3) lower oilfield activity, and 4) lower margins in OFSE.

DINO. We are Buy rated on DINO, and our 6-month, P/E (12.0x normalized EPS) and SOTP-based price target is $142. Key risks relate to refining margins, non-refining earnings, and operational execution.

PR. We are Buy rated on PR with a 12-month price target of $27 is based on a target FCF yield of 12.5% on 2027/2028 estimates with $80/$75 per bbl Brent oil price and $3.50/$3.50 per MMBtu Henry Hub gas price. We apply an M&A rank of 2 for the stock with an 85% weight to a fundamental valuation of ~$26 and a 15% weight to an M&A theoretical valuation of ~$30 based on $80/$80 per bbl Brent oil price and $3.75/$3.75 per MMBtu Henry Hub gas price for 2027/2028. Key risks include costs, well results, commodity price volatility and government pronouncements.

AR. Our 12-month price target of $46 is based on a target FCF yield of 11.0% on 2027/2028 estimates with $80/$75 per bbl Brent oil price and $3.50/$3.50 per MMBtu Henry Hub gas price. Key risks include lower commodity prices (particularly natural gas/NGLs), higher costs, well results and government pronouncements.

GLNG. We are Buy rated with a 12-month $67 price target based on an unlevered DCF discounted at a 9.25% WACC with a 10.5x terminal year EBITDA multiple. Our price target is based on a fundamental valuation at an 85% weight based on an unlevered DCF (with a 25% risking of a fifth FLNG Mark II vessel) discounted at a 9.5% WACC with a 10.5x terminal year EBITDA multiple, and an M&A theoretical value at a 15% weight based on an unlevered DCF (with a 100% inclusion of a fifth FLNG Mark II vessel) discounted at a 9.0% WACC with a 10.5x exit year terminal value EBITDA multiple. Downside risks to our thesis include: Lower global gas pricing, counterparty concentration and geopolitical risk, higher than expected conversion costs, longer than expected conversion timelines, early contract termination, complex and/or atypical financing arrangements weighing on perceived transparency for investors, and lower than guaranteed operational capacity.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Distribution of ratings/investment banking relationships

Goldman Sachs Investment Research global Equity coverage universe

	Rating Distribution			Investment Banking Relationships		
	Buy	Hold	Sell	Buy	Hold	Sell
Global	50%	34%	16%	65%	59%	43%

As of July 1, 2026, Goldman Sachs Global Investment Research had investment ratings on 3,104 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; registered market maker. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject

company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at https://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link: https://www.goldmansachs.com/worldwide/india/research-analyst. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at https://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Global product; distributing entities

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, make a market or act as liquidity provider in, and buy or sell, any securities, derivatives, or other financial instruments referred to in this research (including any financial instruments issued by the companies referred to herein), unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data [illegible] or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for [illegible] securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through

electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.
